

AAKANKSHA PARDEEP KUMAR

Karachi, Pakistan | +92 (303) 2136227

[linkedin.com/in/aakankshapardeep/](https://www.linkedin.com/in/aakankshapardeep/) | aakanksha.pardeep@gmail.com | <https://about-aakanksha.vercel.app/>

Technical Skills

Programming & Databases: Python, SQL

Machine Learning & AI: LLMs, Prompt Engineering, RAG, OpenAI API, LangChain, AI Automation

Tools & Development: Docker, Make, n8n, Git

Backend/Infra: FastAPI, Pinecone, Node.js, PostgreSQL, Supabase, ChromaDB

Work Experience

ICS Group Of Companies

Executive AI Research & Development

August 2026 - Present

AI Research & Development

January 2026 - August 2026

- Built an AI-powered financial reporting tool with JWT-secured access
- Converted Excel uploads into natural-language Q&A and PDF reports, cutting reporting time by 80%
- Automated monthly financial reporting via Make.com, integrating data pulled directly from SAP
- Developed an AI Resume Analyzer (FastAPI + Node.js) scoring resumes against job descriptions, cutting screening time by 60%
- Built an AI Hiring Assessment Generator with one-click PDF/Word export for HR and Finance teams

Avanza Solutions | AI Intern

September 2025 - November 2025

- Built a full-stack, agentic AI Revenue Analyzer to automate pre-sales client engagement
- Powered by n8n and Supabase for seamless workflow orchestration
- Enabled real-time financial insights through RAG-powered natural language queries
- Backed by PostgreSQL for reliable, scalable data handling

Wavetec Pvt. Limited | Data and AI Intern

June 2025 – September 2025

- Analyzed large-scale dashboard data to identify patterns improving chatbot accuracy
- Audited 1,000+ stored procedures across the Spectra Dashboard, improving data reliability
- Built an AI chatbot (n8n, LangChain, GPT-4o) handling real-time customer queries
- Delivered RAG-based support on the company website, improving response accuracy
- Used Supabase and Pinecone for fast, low-latency knowledge retrieval at scale

Projects

NeuroTrack [neurotrackapp](#)

September 2025 – July 2026

- Built an XGBoost classifier achieving 87.76% accuracy on GAMEEMO EEG data
- Deployed full-stack system live using FastAPI and React
- Co-authored research paper submitted to JLUMHS journal

Squared App [squaredapp](#)

August 2026

- Bill-splitting PWA: split equally, custom, or item-by-item; balances simplified to minimum payments; no-login shareable links.

Leadership & Recognition

2nd Place – HackfestX Datathon 2025, IBA Karachi | Team Lead – CSI: Crime Scene Investigation Track

- Led a 6-member team through complex digital forensics tasks under time pressure
- Competed in a 2-day cyberinvestigation challenge at IBA Karachi
- Used Autopsy, FTK Imager, and Sleuth Kit to decrypt all Day 1 files first
- Secured 2nd place among all competing teams

Seeds Of Peace | Maine, USA

June 2019 – August 2019

- Selected as one of 14 delegates from 300+ applicants to represent Pakistan
- Attended the Seeds of Peace International Camp in Maine, USA
- Engaged in structured cross-cultural dialogue with peers from 6 other countries
- Built cross-border understanding through shared perspectives and collaborative activities

Education

Bachelor of Computer Science

Institute of Business Management (IOBM) | Karachi, Pakistan

Coursework: AI, Data Structures & Algorithms, DBMS, OOP, Big Data & Analytics, Cloud Computing.

Final Year Project: *NeuroTrack — EEG-based emotion recognition system using XGBoost, achieving 87.76% accuracy on the GAMEEMO dataset.*

Certifications

- Google Data Analytics Professional Certificate
- Introduction to SQL & Intermediate SQL
- AI For Everyone
- Introduction to LLMs in Python
- Explainable AI in Python
