

AAKANKSHA PARDEEP KUMAR

Karachi, Pakistan | +92 (303) 2136227

[linkedin.com/in/aakankshapardeep/](https://www.linkedin.com/in/aakankshapardeep/) | aakanksha.pardeep@gmail.com | <https://about-aakanksha.vercel.app/>

Technical Skills

Programming & Databases: Python, Pandas, NumPy, MySQL

Machine Learning & AI: Scikit-learn, Supervised & Unsupervised Learning, Regression, Classification, Model Evaluation, Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG)

AI Frameworks & Platforms: OpenAI API, LangChain, Vector Databases (Pinecone / FAISS), n8n AI Automation

Data Visualization: Power BI, Tableau

Data Analysis & Processing: Pandas, NumPy, Data Cleaning, ETL Pipelines, Power Query, Advanced Excel

Tools & Development: Jupyter Notebook, Git, GitHub

Work Experience

ICS Group Of Companies | *AI Engineer*

January 2026 - Present

- Built an AI-powered tool that automates financial reporting from raw Excel uploads cutting manual analysis and report generation time by 80%. The system answers natural language questions over financial data and auto-generates full PDF analytics reports in under 10-20 seconds. Secured with JWT auth and zero data storage all processing is in-memory.
- Built and deployed an AI Resume Analyzer (FastAPI + Node.js) that evaluates resumes against job descriptions generating match scores, candidate summaries, interview questions, and strength/gap analysis. Supports batch processing of up to 10 resumes, cutting manual screening time by 60%.
- Developed an AI Assessment Generator that creates tailored questions across logical reasoning, analytical thinking, role knowledge, and situational judgment with one-click PDF & Word export, making it plug-and-play for live hiring workflows.
- Designed and engineered structured AI prompts for HR & Finance teams to identify hiring patterns, benchmark candidate fit against role and salary data, and automate manual workflows..

Avanza Solutions | *AI Intern*

September 2025 - November 2025

- Developing an agentic AI for the Pre-Sales department to automate client engagement and data collection workflows.
- Built and deployed a full-stack Revenue Analyzer AI Agent using n8n, Supabase, PostgreSQL, and a dynamic frontend, enabling natural language queries, SQL generation, and real-time financial insights.
- Integrated RAG (Retrieval-Augmented Generation) capabilities for enhanced AI reasoning over structured and unstructured data.

Wavetec Pvt. Limited | *Data and AI Intern*

June 2025 – September 2025

- Documented and Analyzed 500+ stored procedures used in the Spectra Dashboard across different modules.
- Integrated Meta's WhatsApp API for template messaging, session flows, and user interaction, with branch-level configuration and role-based access.
- Created standardized documentation with versioning, parameter definitions, flowcharts, and Jira descriptions to improve clarity and traceability.
- Worked on SQL-based audits to identify redundant procedures and generate module-wise stored procedure reports across databases.
- Developed an AI chatbot using n8n, LangChain, LLMs (GPT-4o), Supabase, and Pinecone, integrated with Wavetec's website to handle real-time support through Retrieval-Augmented Generation (RAG) and dynamic memory management.
- Assisted the team in automating report exports and performance metrics using SQL Server Management Studio (SSMS).

Curvet Solution | *Data Analyst Intern*

Sep 2024 – Nov 2024

- Extracted, cleaned, and transformed large datasets using SQL and Python to support business intelligence initiatives.
- Developed interactive dashboards and visual reports in Microsoft Power BI, delivering actionable insights to stakeholders for data-driven decision-making.
- Leveraged Microsoft Office Suite (Excel, Word, PowerPoint, Outlook, Teams) for effective documentation, collaboration, and task management across projects.

Projects

AI Document Analysis Agent

Jan 2026

- Developed an AI-powered PDF analysis agent that allows users to upload documents and ask natural language questions about their content.
- Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain, OpenAI, and ChromaDB for contextual document question answering.
- Implemented backend APIs using FastAPI and Uvicorn to handle document upload, processing, and real-time queries.
- Utilized PyPDF, tiktoken, and Jinja2 to optimize document parsing, token efficiency, and user interaction.

Inventory Management Agent

June 2025

- Built an AI automation agent that monitors inventory stored in Google Sheets.
- Integrated Gemini prompts with n8n workflows to make intelligent inventory management decisions.
- Automated updates and removal of out-of-stock products, reducing manual tracking.

Northwind Company Analysis

Nov 2024

- Created a Power BI dashboard with 10+ dynamic visuals to analyze sales, customer segments, employee performance, and shipping logistics.
- Wrote optimized SQL queries to extract insights on revenue trends and identified key revenue contributors and top 3 order processors, improving team performance visibility.
- Analyzed shipping costs and delivery times, proposing 3 process improvements to enhance logistics and reduce delivery delay.

Superstore Sales and Forecast Dashboard

Sep 2024

- Developed an interactive Power BI dashboard analyzing 10,000+ Superstore sales records, uncovering key insights such as top-selling regions, customer segments, and product categories, empowering data-driven decisions.
- Forecasted 15-day future sales using Power BI's advanced analytics and DAX time-series modeling.
- Cleaned and transformed raw data in Power Query by improving data accuracy and dashboard responsiveness by 30%.
- Identified monthly sales peaks and top-performing regions to guide targeted marketing and inventory strategies, aligning with customer behavior patterns.

Competitions

2nd Place – HackfestX Datathon 2025, IBA Karachi | Team Lead – CSI: Crime Scene Investigation Track

- Led a 6-member team through a two-day cyber-investigation challenge, integrating forensics and real-world clue-solving.
- First to crack the initial clue and decrypt all Day 1 files using tools like Autopsy, FTK Imager, Sleuth Kit, StegExpose.
- Identified the final target ahead of all teams on Day 2 through advanced digital analysis and puzzle-solving.
- Awarded prize money and recognition among top-performing teams for technical excellence and leadership.

NASA Space Apps Challenge 2024 | Python, SQL, Power BI

- Developed an interactive Power BI dashboard to visualize glacier ice loss, freshwater flux, and sea-level impact, supporting climate awareness.
- Highlighted annual and seasonal glacier discharge trends, identifying key climate change indicators through data analysis.
- Created a user-friendly data storytelling website, combining interactive visualizations with impactful climate narratives for public engagement.

Education

Bachelor of Computer Science

Institute of Business Management (IOBM) | Karachi, Pakistan

Relevant Coursework: Artificial Intelligence, Big Data And Analytics, Cloud Computing, Cyber Security, Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Object-Oriented Programming (OOP)

Certifications

- Google Data Analytics Professional Certificate
- Introduction to SQL & Intermediate SQL
- AI For Everyone
- Introduction to LLMs in Python
- Explainable AI in Python
